

# Intelligent Monitoring Report

Report on

The Dudley Group NHS Foundation Trust

July 2014

CQC has developed a new model for monitoring a range of key indicators about NHS acute and specialist hospitals. These indicators relate to the five key questions we will ask of all services – are they safe, effective, caring, responsive and well-led? The indicators will be used to raise questions about the quality of care. They will not be used on their own to make judgements. Our judgements will always be based on the result of an inspection, which will take into account our Intelligent Monitoring analysis alongside local information from the public, the trust and other organisations.

### **What does this report contain?**

This report presents CQC's analysis of the key indicators (which we call 'tier one indicators') for The Dudley Group NHS Foundation Trust. We have analysed each indicator to identify two possible levels of risk.

We have used a number of tests to determine where the thresholds of "risk" and "elevated risk" sit for each indicator, based on our judgement of which statistical tests are most appropriate. These tests include CUSUM and z-scoring techniques. Where an indicator has 'no evidence of risk' this refers to where our statistical analysis has not deemed there to be a "risk" or "elevated risk". For some data sources these thresholds are determined by a rules-based approach - for example concerns raised by staff to CQC (and validated by CQC) are always flagged in the model.

NHS Trusts that have had an inspection at the time of producing this update of Intelligent Monitoring have not been assigned a banding; all other indicator analysis results are shown in their report. "Recently inspected" is stated for these trusts. This is to reflect the fact that CQC's new comprehensive inspections will provide its definitive judgements for each organisation.

Further details of the analysis applied are explained in the accompanying guidance document.

### **What guidance is available?**

We have published a document setting out the definition and full methodology for each indicator. If you have any queries or need more information, please email [enquiries@cqc.org.uk](mailto:enquiries@cqc.org.uk) or use the contact details at [www.cqc.org.uk/contact-us](http://www.cqc.org.uk/contact-us)
