

# Droylsden Medical Practice

## Inspection report

1-3 Albion Drive  
Droylsden  
Manchester  
Lancashire  
M43 7NP  
Tel: 01613427777  
[www.gtdhealthcare.co.uk/practice/droylsden-medical-practice](http://www.gtdhealthcare.co.uk/practice/droylsden-medical-practice)

Date of inspection visit: 23 April 2018  
Date of publication: 05/06/2018

This report describes our judgement of the quality of care at this service. It is based on a combination of what we found when we inspected, information from our ongoing monitoring of data about services and information given to us from the provider, patients, the public and other organisations.

## Ratings

### Overall rating for this location

Good 

Are services safe?	Good 
Are services effective?	Good 
Are services caring?	Good 
Are services responsive?	Good 
Are services well-led?	Good 

# Overall summary

**This practice is rated as Good overall.** (Previous inspection April 2015 – Good)

The key questions are rated as:

Are services safe? – Good

Are services effective? – Good

Are services caring? – Good

Are services responsive? – Good

Are services well-led? - Good

We carried out an announced comprehensive inspection at Droylsden Medical Practice on 23 April 2018 as part of our inspection programme.

At this inspection we found:

- The practice had clear systems to manage risk so that safety incidents were less likely to happen. When incidents did happen, the practice learned from them and improved their processes.

- The practice routinely reviewed the effectiveness and appropriateness of the care it provided. It ensured that care and treatment was delivered according to evidence- based guidelines.
- Staff involved and treated patients with compassion, kindness, dignity and respect.
- Patients feedback was mixed in relation to the appointment system stating it was not always easy to get through on the telephone or to access pre bookable appointments. The practice was addressing concerns and had recently appointed an advanced nurse practitioner to increase appointment availability.
- There was a strong focus on continuous learning and improvement at all levels of the organisation.

**Professor Steve Field** CBE FRCP FFPH FRCGP Chief Inspector of General Practice

## Population group ratings

<b>Older people</b>	<b>Good</b> 
<b>People with long-term conditions</b>	<b>Good</b> 
<b>Families, children and young people</b>	<b>Good</b> 
<b>Working age people (including those recently retired and students)</b>	<b>Good</b> 
<b>People whose circumstances may make them vulnerable</b>	<b>Good</b> 
<b>People experiencing poor mental health (including people with dementia)</b>	<b>Good</b> 

## Our inspection team

Our inspection team was led by a CQC lead inspector.  
The team included a GP specialist adviser.

## Background to Droylsden Medical Practice

Droylsden Medical Practice, part of gtd healthcare is the registered provider and provides primary care services to its registered list of approximately 3808 patients. The practice delivers commissioned services under the Alternative Provider Medical Services (APMS) contract and is a member of Tameside and Glossop Clinical Commissioning Group (CCG).

The APMS contract is the contract between general practices and NHS England for delivering primary care services to local communities. The practice offers direct enhanced services that include meningitis provision, the childhood vaccination and immunisation scheme, facilitating timely diagnosis and support for people with dementia, influenza and pneumococcal immunisations, learning disabilities, minor surgery and rotavirus and shingles immunisation.

Regulated activities are delivered to the patient population from the following addresses:

1-3 Albion Drive,  
Droylsden  
Manchester  
M43 7NP

The practice has a website that contains comprehensive information about what they do to support their patient population and the in-house and online services offered:

Droylsden Medical Practice is part of gtd healthcare a not for profit organisation.

The age profile of the practice population is broadly in line with the CCG averages. Information taken from Public Health England placed the area in which the practice is located in the fourth most deprived (from a possible range of between 1 and 10).

# Are services safe?

**We rated the practice as good for providing safe services.**

## Safety systems and processes

The practice had clear systems to keep people safe and safeguarded from abuse.

- The practice had appropriate systems to safeguard children and vulnerable adults from abuse. All staff received up-to-date safeguarding and safety training appropriate to their role. They knew how to identify and report concerns. Reports and learning from safeguarding incidents were available to staff.
- The safeguarding lead participated in monthly provider (gtd healthcare) meetings in which they are able to discuss case studies, share learning and participate in training.
- Staff who acted as chaperones were trained for their role and had received a DBS check. (DBS checks identify whether a person has a criminal record or is on an official list of people barred from working in roles where they may have contact with children or adults who may be vulnerable.)
- Staff took steps, including working with other agencies, to protect patients from abuse, neglect, harassment, discrimination and breaches of their dignity and respect.
- The practice carried out appropriate staff checks at the time of recruitment and on an on-going basis.
- There was an effective system to manage infection prevention and control.
- The practice had arrangements to ensure that facilities and equipment were safe and in good working order. The practice manager attended quarterly health and safety meetings with gtd healthcare to ensure the practice was maintaining health and safety in line with current guidance and best practices.
- Arrangements for managing waste and clinical specimens kept people safe.

## Risks to patients

There were adequate systems to assess, monitor and manage risks to patient safety.

- Arrangements were in place for planning and monitoring the number and mix of staff needed to meet patients' needs, including planning for holidays, sickness, busy periods and epidemics.

- There was an effective induction system for temporary staff tailored to their role.
- The practice was equipped to deal with medical emergencies and staff were suitably trained in emergency procedures.
- Staff understood their responsibilities to manage emergencies on the premises and to recognise those in need of urgent medical attention. Clinicians knew how to identify and manage patients with severe infections including sepsis.
- When there were changes to services or staff the practice assessed and monitored the impact on safety.

## Information to deliver safe care and treatment

Staff had the information they needed to deliver safe care and treatment to patients.

- The care records we saw showed that information needed to deliver safe care and treatment was available to staff. There was a documented approach to managing test results.
- The practice had systems for sharing information with staff and other agencies to enable them to deliver safe care and treatment.
- Clinicians made timely referrals in line with protocols.

## Appropriate and safe use of medicines

The practice had reliable systems for appropriate and safe handling of medicines.

- The systems for managing and storing medicines, including vaccines, medical gases, emergency medicines and equipment which minimised risks.
- Staff prescribed, administered or supplied medicines to patients and gave advice on medicines in line with current national guidance. The practice had reviewed its antibiotic prescribing and taken action to support good antimicrobial stewardship in line with local and national guidance.
- Patients' health was monitored in relation to the use of medicines and followed up on appropriately. Patients were involved in regular reviews of their medicines.

## Track record on safety

The practice had a good track record on safety.

- There were comprehensive risk assessments in relation to safety issues.

## Are services safe?

- The practice monitored and reviewed activity. This helped it to understand risks and gave a clear, accurate and current picture of safety that led to safety improvements.

### **Lessons learned and improvements made**

The practice learned and made improvements when things went wrong.

- Staff understood their duty to raise concerns and report incidents and near misses. Leaders and managers supported them when they did so.
- There were systems for reviewing and investigating when things went wrong. The practice learned and

shared lessons identified themes and took action to improve safety in the practice. The practice was supported by gtd healthcare head office in monitoring both complaints and significant events. The practice attended bi-monthly governance meetings with gtd healthcare to monitor outcomes and share good practice across the organisation.

- The practice acted on and learned from external safety events as well as patient and medicine safety alerts.

**Please refer to the Evidence Tables for further information.**

# Are services effective?

## We rated the practice and all of the population groups as good for providing effective services overall

(Please note: Any Quality Outcomes (QOF) data relates to 2016/17. QOF is a system intended to improve the quality of general practice and reward good practice.)

### Effective needs assessment, care and treatment

The practice had systems to keep clinicians up to date with current evidence-based practice. We saw that clinicians assessed needs and delivered care and treatment in line with current legislation, standards and guidance supported by clear clinical pathways and protocols.

- Patients' immediate and on-going needs were fully assessed. This included their clinical needs and their mental and physical wellbeing.
- We saw no evidence of discrimination when making care and treatment decisions.
- Staff used appropriate tools to assess the level of pain in patients.
- Staff advised patients what to do if their condition got worse and where to seek further help and support.

#### Older people:

- Older patients who are frail or may be vulnerable received a full assessment of their physical, mental and social needs. The practice used an appropriate tool to identify patients aged 65 and over who were living with moderate or severe frailty. Those identified as being frail had a clinical review including a review of medication.
- Patients aged over 75 were invited for a health check. If necessary they were referred to other services such as voluntary services and supported by an appropriate care plan.
- The practice followed up on older patients discharged from hospital. It ensured that their care plans and prescriptions were updated to reflect any extra or changed needs.
- Staff had appropriate knowledge of treating older people including their psychological, mental and communication needs.

#### People with long-term conditions:

- Patients with long-term conditions had a structured annual review to check their health and medicines

needs were being met. For patients with the most complex needs, the GP worked with other health and care professionals to deliver a coordinated package of care.

- Staff who were responsible for reviews of patients with long term conditions had received specific training.
- GPs followed up patients who had received treatment in hospital or through out of hours services for an acute exacerbation of asthma.
- The practice had arrangements for adults with newly diagnosed cardiovascular disease including the offer of high-intensity statins for secondary prevention, people with suspected hypertension were offered ambulatory blood pressure monitoring and patients with atrial fibrillation were assessed for stroke risk and treated as appropriate.
- The practice was able to demonstrate how they identified patients with commonly undiagnosed conditions, for example diabetes, chronic obstructive pulmonary disease (COPD), atrial fibrillation and hypertension)

#### Families, children and young people:

- Childhood immunisations were carried out in line with the national childhood vaccination programme. Uptake rates for the vaccines given were in line with the target percentage of 90% or above.
- The practice had arrangements to identify and review the treatment of newly pregnant women on long-term medicines. These patients were provided with advice and post-natal support in accordance with best practice guidance.
- The practice had arrangements for following up failed attendance of children's appointments following an appointment in secondary care or for immunisation.

#### Working age people (including those recently retired and students):

- The practice's uptake for cervical screening was in line with the 80% coverage target for the national screening programme.
- The practices' uptake for breast and bowel cancer screening was in line the national average.
- The practice had systems to inform eligible patients to have the meningitis vaccine, for example before attending university for the first time.

## Are services effective?

- Patients had access to appropriate health assessments and checks including NHS checks for patients aged 40-74. There was appropriate follow-up on the outcome of health assessments and checks where abnormalities or risk factors were identified.

People whose circumstances make them vulnerable:

- End of life care was delivered in a coordinated way which took into account the needs of those whose circumstances may make them vulnerable.
- The practice held a register of patients living in vulnerable circumstances including homeless people, travellers and those with a learning disability.
- The practice had a system for vaccinating patients with an underlying medical condition according to the recommended schedule.

People experiencing poor mental health (including people with dementia):

- The practice assessed and monitored the physical health of people with mental illness, severe mental illness, and personality disorder by providing access to health checks, interventions for physical activity, obesity, diabetes, heart disease, cancer and access to 'stop smoking' services. There was a system for following up patients who failed to attend for administration of long term medication.
- When patients were assessed to be at risk of suicide or self-harm the practice had arrangements in place to help them to remain safe.
- Patients at risk of dementia were identified and offered an assessment to detect possible signs of dementia. When dementia was suspected there was an appropriate referral for diagnosis.
- The practice offered annual health checks to patients with a learning disability.

### Monitoring care and treatment

The practice had a comprehensive programme of quality improvement activity and routinely reviewed the effectiveness and appropriateness of the care provided. Where appropriate, clinicians took part in local and national improvement initiatives and regularly attended training and events held by the provider gtd healthcare.

- The practice used information about care and treatment to make improvements.

- The practice was actively involved in quality improvement activity. Where appropriate, clinicians took part in local and national improvement initiatives.

### Effective staffing

Staff had the skills, knowledge and experience to carry out their roles.

- Staff had appropriate knowledge for their role, for example, to carry out reviews for people with long term conditions, older people and people requiring contraceptive reviews.
- Staff whose role included immunisation and taking samples for the cervical screening programme had received specific training and could demonstrate how they stayed up to date.
- The practice understood the learning needs of staff and provided protected time and training to meet them. Up to date records of skills, qualifications and training were maintained. Staff were encouraged and given opportunities to develop.
- The practice provided staff with on-going support. This included an induction process, one-to-one meetings, appraisals, coaching and mentoring, clinical supervision and support for revalidation. The induction process for healthcare assistants included the requirements of the Care Certificate. The practice ensured the competence of staff employed in advanced roles by audit of their clinical decision making, including non-medical prescribing.
- There was a clear approach for supporting and managing staff when their performance was poor or variable.

### Coordinating care and treatment

Staff worked together and with other health and social care professionals to deliver effective care and treatment.

- We saw records that showed that all appropriate staff, including those in different teams and organisations, were involved in assessing, planning and delivering care and treatment.
- The practice shared clear and accurate information with relevant professionals when deciding care delivery for people with long term conditions and when coordinating healthcare for care home residents. The shared information with, and liaised, with community

## Are services effective?

services, social services and carers for housebound patients and with health visitors and community services for children who have relocated into the local area.

- Patients received coordinated and person-centred care. This included when they moved between services, when they were referred, or after they were discharged from hospital. The practice worked with patients to develop personal care plans that were shared with relevant agencies.
- The practice ensured that end of life care was delivered in a coordinated way which took into account the needs of different patients, including those who may be vulnerable because of their circumstances.

### Helping patients to live healthier lives

Staff were consistent and proactive in helping patients to live healthier lives.

- The practice identified patients who may be in need of extra support and directed them to relevant services. This included patients in the last 12 months of their lives, patients at risk of developing a long-term condition and carers.
- Staff encouraged and supported patients to be involved in monitoring and managing their own health, for example through social prescribing schemes.

- Staff discussed changes to care or treatment with patients and their carers as necessary.
- The practice supported national priorities and initiatives to improve the population's health, for example, stop smoking campaigns, tackling obesity.
- The 'Be well' team attended the practice twice a week for patients to access one to one guidance and support to maintain a healthy lifestyle.

### Consent to care and treatment

The practice obtained consent to care and treatment in line with legislation and guidance.

- Clinicians understood the requirements of legislation and guidance when considering consent and decision making.
- Clinicians supported patients to make decisions. Where appropriate, they assessed and recorded a patient's mental capacity to make a decision.
- The practice monitored the process for seeking consent appropriately.

**Please refer to the Evidence Tables for further information.**

# Are services caring?

**We rated the practice as good for caring.**

## **Kindness, respect and compassion**

Staff treated patients with kindness, respect and compassion and we saw numerous examples of where staff showed this when supporting patients. We saw staff had a good awareness of patient's individual needs and were committed to providing person centred care.

Feedback from patients was positive about the way staff treat people.

- Staff understood patients' personal, cultural, social and religious needs.
- The practice gave patients timely support and information.

## **Involvement in decisions about care and treatment**

Staff helped patients to be involved in decisions about care and treatment. They were aware of the Accessible Information Standard (a requirement to make sure that patients and their carers can access and understand the information that they are given.)

- Staff communicated with people in a way that they could understand, for example, communication aids and easy read materials were available.
- Staff helped patients and their carers find further information and access community and advocacy services. They helped them ask questions about their care and treatment.
- The practice proactively identified carers and supported them.

## **Privacy and dignity**

The practice respected patients' privacy and dignity.

- Reception staff knew that if patients wanted to discuss sensitive issues or appeared distressed they could offer them a private room to discuss their needs.
- Staff recognised the importance of people's dignity and respect. They challenged behaviour that fell short of this.

**Please refer to the Evidence Tables for further information.**

# Are services responsive to people's needs?

**We rated the practice, and all of the population groups, as good for providing responsive services**

## Responding to and meeting people's needs

The practice organised and delivered services to meet patients' needs. It took account of patient needs and preferences.

- The practice understood the needs of its population and tailored services in response to those needs.
- Telephone consultations with a GP were available which supported patients who were unable to attend the practice during normal working hours.
- The facilities and premises were appropriate for the services delivered.
- The practice made reasonable adjustments when patients found it hard to access services.
- The practice provided effective care coordination for patients who were more vulnerable or who had complex needs. They supported them to access services both within and outside the practice.
- Care and treatment for patients with multiple long-term conditions and patients approaching the end of life was coordinated with other services.
- A free telephone line was available at the practice, giving patients direct access to Citizens Advice. The free service enables patients to discuss any concerns or issues while visiting the GP practice.
- The practice was part of a gtd healthcare wide acute visiting scheme in which an acute visiting practitioner would carry out home visits on behalf of the practice. Initial evaluation of the scheme by the practice and feedback from patients showed positive outcomes as a result of the scheme.

Older people:

- All patients had a named GP who supported them in whatever setting they lived, whether it was at home or in a care home or supported living scheme.
- The practice was responsive to the needs of older patients, and offered home visits and urgent appointments for those with enhanced needs. The GP and practice nurse also accommodated home visits for those who had difficulties getting to the practice due to limited local public transport availability.
- There was a medicines delivery service for housebound patients.

People with long-term conditions:

- Patients with a long-term condition received an annual review to check their health and medicines needs were being appropriately met. Multiple conditions were reviewed at one appointment, and consultation times were flexible to meet each patient's specific needs.
- The practice held regular meetings with the local district nursing team to discuss and manage the needs of patients with complex medical issues.

Families, children and young people:

- We found there were systems to identify and follow up children living in disadvantaged circumstances and who were at risk, for example, children and young people who had a high number of accident and emergency (A&E) attendances. Records we looked at confirmed this.
- All parents or guardians calling with concerns about a child under the age of 18 were offered a same day appointment when necessary.

Working age people (including those recently retired and students):

- The needs of this population group had been identified and the practice had adjusted the services it offered to ensure these were accessible, flexible and offered continuity of care. For example, extended opening hours and Saturday appointments.

People whose circumstances make them vulnerable:

- The practice held a register of patients living in vulnerable circumstances including homeless people, travellers and those with a learning disability.
- People in vulnerable circumstances were easily able to register with the practice, including those with no fixed abode
- The Practice referred patients to the local Food Bank service where appropriate

People experiencing poor mental health (including people with dementia):

- Staff interviewed had a good understanding of how to support patients with mental health needs and those patients living with dementia.

## Timely access to care and treatment

Patients were able to access care and treatment from the practice within an acceptable timescale for their needs.

## Are services responsive to people's needs?

- Patients had timely access to initial assessment, test results, diagnosis and treatment.
- Waiting times, delays and cancellations were minimal and managed appropriately.
- Patients with the most urgent needs had their care and treatment prioritised.
- Patients reported that the appointment system was easy to use.
- In January 2018 the practice appointed an advanced nurse practitioner to increase the number of on the day appointments available to patients.

Results from the national GP survey were below average in relation to making an appointment, for example:

- The percentage of respondents to the GP patient survey who stated that the last time they wanted to see or speak to a GP or nurse from their GP surgery they were able to get an appointment (01/01/2017 to 31/03/2017) was 48% compared to the CCG average of 72%
- The percentage of respondents to the GP patient survey who responded positively to the overall experience of making an appointment (01/01/2017 to 31/03/2017) was 44% compared to the CCG average of 69%.

The practice were proactive in improving access and had employed additional clinical staff including an advanced nurse practitioner to increase the number of appointments and were working with the buildings management company to install a new telephone system.

### **Listening and learning from concerns and complaints**

The practice took complaints and concerns seriously and responded to them appropriately to improve the quality of care.

- Information about how to make a complaint or raise concerns was available. Staff treated patients who made complaints compassionately.
- The complaint policy and procedures were in line with recognised guidance. The practice learned lessons from individual concerns and complaints and also from analysis of trends. It acted as a result to improve the quality of care.
- The practice carried out an annual review of complaints to identify any patterns or trends and these were shared during team meetings. The practice also attended bi-monthly governance meetings with the provider gtd healthcare in which complaints were discussed and monitored.

**Please refer to the Evidence Tables for further information.**

# Are services well-led?

**We rated the practice and all of the population groups as good for providing a well-led service.**

## **Leadership capacity and capability**

Leaders had the capacity and skills to deliver high-quality, sustainable care.

- Leaders were knowledgeable about issues and priorities relating to the quality and future of services. They understood the challenges and were addressing them.
- Leaders at all levels were visible and approachable. They worked closely with staff and others to make sure they prioritised compassionate and inclusive leadership.
- The practice had effective processes to develop leadership capacity and skills, including planning for the future leadership of the practice.
- The practice is part of gtd healthcare a not for profit organisation and benefited from support from gtd healthcare for example access to human resources and clinical leadership for guidance and support.

## **Vision and strategy**

The practice had a clear vision and credible strategy to deliver high quality, sustainable care.

- There was a clear vision and set of values. The practice had a realistic strategy and supporting business plans to achieve priorities. Their vision and values reflected those of the provider gtd healthcare and included: 'put patients first, give great quality care and contribute to the wellbeing of our local community'.
- Staff were aware of and understood the vision, values and strategy and their role in achieving them.
- The strategy was in line with health and social priorities across the region. The practice planned its services to meet the needs of the practice population.
- The practice monitored progress against delivery of the strategy.

## **Culture**

The practice had a culture of high-quality sustainable care.

- Staff stated they felt respected, supported and valued. They were proud to work in the practice.
- The practice focused on the needs of patients.
- Leaders and managers acted on behaviour and performance inconsistent with the vision and values.

- Openness, honesty and transparency were demonstrated when responding to incidents and complaints. The provider was aware of and had systems to ensure compliance with the requirements of the duty of candour.
- Staff we spoke with told us they were able to raise concerns and were encouraged to do so. They had confidence that these would be addressed.
- There were processes for providing all staff with the development they need. This included appraisal and career development conversations. All staff received regular annual appraisals in the last year. Staff were supported to meet the requirements of professional revalidation where necessary.
- Clinical staff were considered valued members of the practice team. They were given protected time for professional development and evaluation of their clinical work.
- There was a strong emphasis on the safety and well-being of all staff.
- The practice actively promoted equality and diversity. Staff had received equality and diversity training. Staff felt they were treated equally.
- There were positive relationships between staff and teams.

## **Governance arrangements**

There were clear responsibilities, roles and systems of accountability to support good governance and management.

- Structures, processes and systems to support good governance and management were clearly set out, understood and effective. The governance and management of partnerships, joint working arrangements and shared services promoted interactive and co-ordinated person-centred care.
- Staff were clear on their roles and accountabilities including in respect of safeguarding and infection prevention and control
- Practice leaders had established proper policies, procedures and activities to ensure safety and assured themselves that they were operating as intended.

## **Managing risks, issues and performance**

There were clear and effective processes for managing risks, issues and performance.

# Are services well-led?

- There was an effective, process to identify, understand, monitor and address current and future risks including risks to patient safety.
- The practice had processes to manage current and future performance. Performance of employed clinical staff could be demonstrated through audit of their consultations, prescribing and referral decisions. Practice leaders had oversight of national and local safety alerts, incidents, and complaints.
- Clinical audit had a positive impact on quality of care and outcomes for patients. There was clear evidence of action to change practice to improve quality.
- The practice had plans in place and had trained staff for major incidents.
- The practice implemented service developments and where efficiency changes were made this was with input from clinicians to understand their impact on the quality of care.

## Appropriate and accurate information

The practice acted on appropriate and accurate information.

- Quality and operational information was used to ensure and improve performance. Performance information was combined with the views of patients.
- Quality and sustainability were discussed in relevant meetings where all staff had sufficient access to information.
- The practice used performance information which was reported and monitored and management and staff were held to account.
- The information used to monitor performance and the delivery of quality care was accurate and useful. There were plans to address any identified weaknesses.
- The practice used information technology systems to monitor and improve the quality of care.
- The practice submitted data or notifications to external organisations as required.

- There were robust arrangements in line with data security standards for the availability, integrity and confidentiality of patient identifiable data, records and data management systems.

## Engagement with patients, the public, staff and external partners

The practice involved patients, the public, staff and external partners to support high-quality sustainable services.

- A full and diverse range of patients', staff and external partners' views and concerns were encouraged, heard and acted on to shape services and culture. There was an active patient participation group.
- The service was transparent, collaborative and open with stakeholders about performance.

## Continuous improvement and innovation

There were systems and processes for learning, continuous improvement and innovation.

- There was a focus on continuous learning and improvement.
- Staff knew about improvement methods and had the skills to use them.
- The practice made use of internal and external reviews of incidents and complaints. Learning was shared and used to make improvements.
- Leaders and managers encouraged staff to take time out to review individual and team objectives, processes and performance.
- The practice was part of a gtd healthcare wide acute visiting scheme in which an acute visiting practitioner would carry out home visits on behalf of the practice. Initial evaluation of the scheme by the practice and feedback from patients showed positive outcomes as a result of the acute visiting scheme.

**Please refer to the Evidence Tables for further information.**
